Notes:

Revival is located in a residential neighbourhood, and as such, we must respect our residents by controlling volume levels on the perimeter of the building. As of October 1, 2019, The City of Toronto Noise By-Law states that sound levels 1m from the façade of the building must not exceed 50dBa or 65dBc average over 10 minutes. In lieu of this, Revival has sound level limits which are measured at FOH: **110dBc** or **103 dBa**, whichever is lesser.
